ILLINOIS COUNTIES INFORMATION MANAGEMENT ASSOCIATION
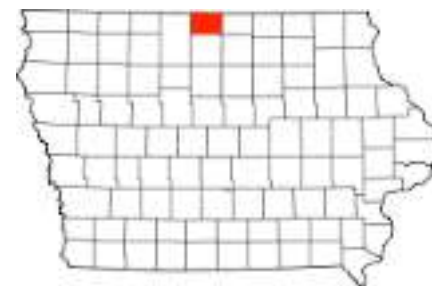

COUNTY CASE STUDIES

September 2016

Michael A. Atkinson – Solutions Architect

Winnebago County, Iowa

- About 11K residents
- County seat is Forest City
- Rural
- Governed by a Board of Supervisors
- Uses FireEye for Email
- "You guys are part of the reason I can sleep at night" – **Eric Guth**, county IT Director

FireEye

Winnebago County, Illinois

- About 300K residents
- County seat is Rockford
- Mix of urban, suburban and rural
- Governed by a Board
- Uses FireEye for Network
- Acts as an IT service provider for County agencies and several municipalities within the County
- Very happy with detection and blocking efficacy and stated that ransomware problems have completely stopped

FireEye

DuPage County, Illinois

- Nearly 1M residents
- County seat is Wheaton
- Governed by a Board
- Uses FireEye for Network and Endpoint
- Has served as a reference for FireEye several times
- "When it came time to complement our Network Security Perimeter, FireEye was a logical choice. From its ease of deployment, to its "Fire and Forget" style of Network Surveillance, FireEye made perfect sense for DuPage County IT. FireEye takes all the guess work out of Advanced Malware Protection Services." – **Eric J. Sherpan**, Senior Network Analyst

FireEye

Maricopa County, Arizona

- Over 4M residents – more populous than 23 states
- County seat is Phoenix
- Form of government is five-member Board of Supervisors, with Chair elected from within
- Uses FireEye for Email, Network Forensics, Threat Analytics, and Constant Vigilance
- "FireEye is a fantastic strategic partner for Maricopa County. We've been able to achieve things that apart we would not have been able to do." – **David L. Stevens**, CIO for Maricopa County
- "FireEye has reduced our malware liability significantly, very significantly. " – **Michael Echols**, CISO for Maricopa County
